

Key Challenges

- Time-consuming & manual spot vehicle process led to delay in vehicle sourcing & limited transporter participation
- Lack of audit trail to validate spot freight cost to higher management
- Manual negotiations & limited participation led to higher freight costs.

What SuperProcure Did

By using SuperProcure's Reverse Auction feature, we can reach multiple transporters at once, which allows for more transporter participation & faster vehicle placement.

100% Audit compliance added transparency to the process.

A pool of multiple transporters enabled us to expand into new lanes & reduced freight costs by 3-4%

Results

3-4%

Savings In Freight Costs

100%

Audit Adherence

Customer Testimony
