

SuperProcure

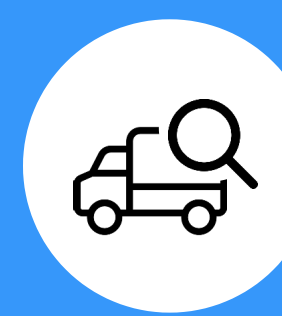

Transportation Management Simplified

Key Challenges

- Manual sourcing of trucks made overall operations more complicated
- When regular transporters failed to deliver vehicles as expected, more time was spent on vehicle sourcing
- Lack of visibility into operations

What SuperProcure Did

Freight sourcing tool improved vehicle sourcing operations

Timely arrangement of replacement vehicle was possible in case of default by transporter

By utilizing digital tools (TMS), the entire process can be managed efficiently

Results

Transparency

End-to-end visibility

Customer Testimony

Swati Chavan
