

## Key Challenges

- Creating indents manually for each transporter for different locations was time consuming, resulting in loss of man-hours
- No real-time visibility of shipment in-transit
- If the agreed transporter refused to place vehicle, arranging a replacement vehicle in short time was difficult leading to non-placement or higher freight rates

## What SuperProcure Did

One click is all it takes to create multiple indents. By digitizing the sourcing, the team completed the task in 5 minutes instead of an hour or so

100% real time tracking of the fleet increased customer retention

Truck placement is not impacted by the non-availability of the nominated transporter, thus giving 100% vehicle placement assurance

## Results

100%

Real-time Visibility

100%

Vehicle Placement Assurance

## Customer Testimony

**Sathyendran Arumorth**

Assistant Manager  
Logistics

"SuperProcure stands for 100% vehicle placement assurance, real-time visibility, data-backed decisions, and excellent customer support."
